

ScanRead™ API *image quality assurance*

The Universal Reader and Scanner Interface

- Check Scanner Independence
- I.Q.A. (Image Quality Assurance)
- Emmedi technical reputation
- Strong reputation: more than 40.000 copies installed all over the world

The Universal Reader and Scanner Interface

The easiest, fastest and most powerful way to interface most of the readers and scanners available in the market.

ScanRead™ API is a S.D.K. that allows software integrators to reduce development time and maintenance costs.

More than 30 of the most popular check readers and scanners supported.

Emmedi is leader in application software for check processing with 35.000 applications installed in several different banks in Italy.

ScanRead™ API is now a standard in this and other markets all over the world.

The technical support that a software house with such specific and complete know how can offer to the software integrators can be much more efficient than the standard that can be offered by the hardware providers.
